Contents for Volume 87

Foreword v

Preface vii

INTRODUCTORY LECTURE

Role of coatings in energy-producing systems: an overview 1
J. Stringer (Palo Alto, CA, U.S.A.)

HIGH TEMPERATURE GASEOUS CORROSION-ENHANCED SULFIDIZING OR CARBURIZING OXIDATION

Various aspects of high temperature corrosion in aggressive atmospheres containing sulphur, oxygen or both 11
J. C. Colson and J. P. Larpin (Dijon, France)

Carburization and oxidation 23
H. J. Grabke and I. Wolf (Düsseldorf, F.R.G.)

Diffusional growth of multiphase scales and subscales on binary alloys: a review 35
W. W. Smeltzer (Hamilton, Ontario, Canada)

High temperature corrosion of nickel and dilute nickel-based alloys in (SO_2-O_2) SO_3 mixtures. 45
A. Andersen, B. Haflan, P. Kofstad and P. K. Lillerud (Oslo, Norway)

Sulphidation properties of chromium and chromium-containing alloys at high temperatures 51
T. Narita and T. Ishikawa (Sapporo, Japan)

Etude de la corrosion d'alliages Fe–Cr–Ni–Al dans des milieux de simulation des atmosphères de gazéification du charbon à 500–700 °C 63
M. Tachikart (Compiègne, France), J. H. Davidson (Imphy, France), F. Armanet and G. Béranger (Compiègne, France)

Simulation of oxidation phenomena during high temperature transients: application to zirconium alloys in steam. 73
A. N. Wilhelm and E. A. Garcia (Buenos Aires, Argentina)

Relation between the alloy composition and the lamellar morphology of the oxide scale. 81
J. C. Cannot, M. Lallemant, J. P. Larpin and G. Bertrand (Dijon, France)

High temperature sulphide corrosion of manganese and Mn–Nb alloys 89
M. Danielewski and S. Mrowec (Kraków, Poland)

Oxidation–sulfidation behavior of nickel-base superalloys and M–Cr–Al coatings 99
K. Natesan (Argonne, IL, U.S.A.)

High temperature corrosion in the service environments of a nuclear process heat plant 107
W. J. Quadakkers (Jülich, F.R.G.)

The interaction of carbon and sulfur with iron-base alloys in predominantly carburizing environments 113
T. A. Ramanarayanan (Annandale, NJ, U.S.A.)

Penetration of foreign elements connected with internal precipitation: a computer-based description and first experimental verification 119
H. G. Sockel, H. J. Christ (Erlangen, F.R.G.) and W. Christl (Frankfurt, F.R.G.)

Oxidation–sulfidation of an Fe–25Cr–10Al alloy in H_2–H_2O–H_2S gas mixtures 125
G. J. Yurek and K. Przybylski (Cambridge, MA, U.S.A.)

On the formation of η' carbides during high temperature corrosion of three nickel-based alloys in nuclear process heat helium 131
U. Zimmermann, H. Grimmer (Würenlingen, Switzerland) and D. Grman (Dübendorf, Switzerland)

Effects of aluminium and silicon on the oxidation resistance of 13Cr–Ti ferritic stainless steel 137
P. Becquerelle, M. Hubert, B. Savage (Villeneuve D'Ascq, France), J. C. Bavay and P. Bourgain (Isbergues, France)

Sur certaines textures dans les couches de corrosion en relation avec leur stratification 145
C. Rousselet, L. Lattaud, D. Ciosmak, G. Bertrand (Dijon, France), C. Laruelle and J. J. Heizmann (Metz, France)

Sulfuration et carburation d'un acier inoxydable AISI 304H par gaz chauds dans un régénérateur de catalyseurs d'unités de cracking 151
J. Charles, B. Bonnefois, F. Dupoiron (Le Creusot, France), R. Demeulenaere and D. Grunenwald (Feyzin, France)

High temperature corrosion of the nickel-based alloy Inconel 617 in helium containing small amounts of impurities 161
H.-J. Christ, U. Künecke, K. Meyer and H. G. Sockel (Erlangen, F.R.G.)

Corrosion of materials in an environment typical of coal gasification plants 169
W. Debruyn, F. Casteels and H. Tas (Mol, Belgium)

Comportement d'un alliage Fe–2,25Cr–1Mo dans des atmosphères oxydantes et/ou sulfurantes 175
A. Skalli, A. Galerie and M. Caillet (Saint-Martin-d'Hères, France)

Sulphidation behaviour of β-NiAl–α-Cr pseudobinary alloys 183
E. Godlewska, K. Godlewski and S. Mrowec (Kraków, Poland)

Corrosion behaviour of Incoloy 800 and Nimonic 75 in prototype nuclear process helium and in wet helium under special flow conditions 189
H. Grimmer (Würenlingen, Switzerland), D. Grman (Dübendorf, Switzerland), N. Iniotakis (Jülich, F.R.G.) and U. Zimmerman (Würenlingen, Switzerland)

Gas–metal reactions of a new Fe–Ni–Cr–W alloy in helium with reactive components and in an H_2–CH_4–H_2S atmosphere in the temperature range 700–950 °C 197
B. Huchtemann and P. Schüler (Krefeld, F.R.G.)

High temperature oxidation of aluminide coatings 205
Z. El Majid and M. Lambertin (Dijon, France)

Simultaneous oxidation and tellurization of SUS-316 stainless steel for fast breeder reactor fuel cladding. 211
M. Saito, H. Furuya and M. Sugisaki (Fukuoka, Japan)

Comportement de matériaux métalliques contenant de l'aluminium en présence d'une atmosphère sulfurante et peu oxydante 219
M. Broc, P. Fauvet, P. Olivier and J. Sannier (Fontenay-aux-Roses, France)

Deposit-induced sulphidation of fluidized-bed combustor heat exchangers 227
S. R. J. Saunders and S. J. Spencer (Teddington, U.K.)

The breakaway corrosion of Fe–Cr alloys in atmospheres containing sulfur and oxygen 237
S.-H. Choi (Berkeley, CA, U.S.A.) and J. Stringer (Palo Alto, CA, U.S.A.)

FAILURE AND SPALLING OF PROTECTIVE OXIDE LAYERS

The role of point defects in oxide scales in oxidation behaviour: a review. 243
F. Gesmundo (Genoa, Italy)

Influence of active elements on the oxidation mechanism of M–Cr–Al alloys. 251
A. M. Huntz (Orsay, France)

Some comments on the role of yttrium in protective oxide scale adherence 261
J. G. Smeggil (East Hartford, CT, U.S.A.)

Growth and adhesion of oxide scales on Al_2O_3-forming alloys and coatings 267
F. H. Stott and G. C. Wood (Manchester, U.K.)

Adherence of oxide scale formed on Ni–20Cr–1Si alloys with small additions of rare earth elements 275
Y. Saito, T. Maruyama (Yokohama, Japan) and T. Amano (Sendai, Japan)

The influence of implanted yttrium on the oxidation behaviour of β-NiAl 281
J. Jedliński and S. Mrowec (Kraków, Poland)

Application of the acoustic emission technique for the detection of oxide scale cracking during thermal cycling 289
W. Christl, A. Rahmel and M. Schütze (Frankfurt-am-Main, F.R.G.)

The effect of surface-applied reactive metal oxides on the high temperature oxidation of alloys 295
P. Y. Hou (Berkeley, CA, U.S.A.) and J. Stringer (Palo Alto, CA, U.S.A.)

ENHANCEMENT OF ATTACK BY THE PRESENCE OF MOLTEN SALTS

Thermomechanical diagrams: some applications to the study of high temperature corrosion 303
M. Pourbaix (Brussels, Belgium)

Chemistry and electrochemistry of hot corrosion of metals 319
R. A. Rapp (Columbus, OH, U.S.A.)

Low temperature hot corrosion of Co–Cr–Al alloys 329
K. L. Luthra and O. H. LeBlanc, Jr. (Schenectady, NY, U.S.A.)

Mécanismes de corrosion à chaud de revêtements d'aluminiures type Ni–Al en conditions aéronautiques . . . 337
R. Morbioli (Evry, France), P. Steinmetz (Vandoeuvre les Nancy, France) and C. Duret (Châtillon, France)

Electrochémical aspects of molten-salt-enhanced corrosion 345
A. Rahmel (Frankfurt-am-Main, F.R.G.)

Hot corrosion of Co–Cr–Al–Y by molten sulfate–vanadate deposits 353
R. L. Jones and C. E. Williams (Washington, DC, U.S.A.)

Performance of high temperature coatings on F100 turbine blades under simulated service conditions. 361
A. J. A. Mom and H. J. C. Hersbach (Marknesse, The Netherlands)

Etude de la corrosion de différents aciers par le mélange fondu de nitrate–nitrite alcalins 369
P. Spiteri, P. Saint-Paul (Ecuelles, France), G. Picard, H. Lefebvre and B. Tremillon (Paris, France)

Corrosion of nickel by V_2O_5: critical phenomenon due to O_2 pressure. 379
E. Chassagneux, G. Thomas and M. Soustelle (Saint-Etienne, France)

Corrosion par les mélanges fondus Na_2CO_3–Na_2SO_4–NaCl: applications aux matériaux des chaudières de recuperation (procédé Kraft). 383
L. Petit (Grenoble, France) and J. J. Rameau (Saint-Martin-d'Hères, France)

The high temperature corrosion of a commercial aluminide coating on IN-738LC and MAR-M002 at 700 and 830 °C. 389
T. N. Rhys-Jones (Düsseldorf, F.R.G.) and N. Swindells (Liverpool, U.K.)

NaCl-induced hot corrosion of stainless steels 399
Y. Shinata, F. Takahashi and K. Hashiura (Akita, Japan)

AUTHOR INDEX 407

SUBJECT INDEX 409

Contents for Volume 88

PROTECTIVE COATING FORMULATION AND APPLICATION TECHNIQUES

Les revêtements par diffusion 1
R. Mevrel and R. Pichoir (Châtillon, France)

Cobalt-based superalloys for applications in gas turbines 11
D. Coutsouradis, A. Davin and M. Lamberigts (Liège, Belgium)

Distribution de la poudre dans un jet plasma sous pression partielle. 21
P. Mazars and D. Manesse (Colombes, France)

Sur l'elaboration et la tenue comparative à l'oxydation et à la sulfuration de revêtements obtenus par siliciuration, calorisation et aluminage 29
S. Audisio, A. Kosem and H. Mazille (Villeurbanne, France)

The effectiveness of vapour-deposited SiO_2 coatings in preventing carburization of Incoloy 800H 37
E. Lang (Petten, The Netherlands), M. J. Bennett and C. F. Knights (Didcot, U.K.)

Recherche d'un revêtement protecteur de la boulonnerie de circuit primaire des centrales à eau pressurisée contre la corrosion en milieu acide borique concentré. 47
J. M. Gras (Moret-Sur-Loing, France)

CERAMIC COATINGS

Comportement des céramiques en atmosphères oxydantes 53
M. Billy (Limoges, France)

Corrosion mechanisms of ceramic coatings in diesel engines. 61
I. Kvernes and S. Forseth (Oslo, Norway)

Survivability of thermal barrier coatings. 69
H. Herman (Stony Brook, NY, U.S.A.) and N. R. Shankar (Orangeburg, NY, U.S.A.)

The action of heavy oil combustion products on aluminosilicate refractories. 75
G. Mascolo and O. Marino (Naples, Italy)

Silicide coatings for carburization protection 81
G. Southwell, S. MacAlpine and D. J. Young (New South Wales, Australia)

ROLE OF COATING MICROSTRUCTURE IN CORROSION

Etude de l'oxydation à 850 °C de l'alliage Ni-Co-Cr-Al(-Y)-Ta coulé et projeté au chalumeau plasma sous pression réduite. 89
M. Frances, M. Vilasi, M. Mansour-Gabr, J. Steinmetz and P. Steinmetz (Vandoeuvre, France)

Microstructure of oxide scales formed on cyclically oxidized M-Cr-Al-Y coatings 97
P. Choquet, C. Indrigo and R. Mevrel (Chatillon, France)

The effect of chromium on the corrosion resistance of aluminide coatings on nickel and nickel-based substrates. 103
K. Godlewski and E. Godlewska (Kraków, Poland)

L'influence du hafnium du substrat sur la résistance à l'oxydation des revêtements d'aluminiures sur les superalliages base nickel 111
J. M. N'Gandu Muamba, R. Streiff (Marseille, France) and D. H. Boone (Monterey, CA, U.S.A.)

Diffusion phenomena in coatings for high temperature service 123
A. Zambon and E. Ramous (Padua, Italy)

POST-COATING TREATMENTS-LASER IRRADIATION AND IRON IMPLANTATION TECHNIQUES

Elaboration d'alliages de surface sous irradiation laser. 127
A. Galerie, M. Pons and M. Caillet (Saint-Martin-d'Hères, France)

Corrosion protection by vapour-deposited and laser-fused SiO_2 coatings. 135
A. A. Ansari, S. R. J. Saunders (Teddington, U.K.), M. J. Bennett, A. T. Tuson, C. F. Ayres (Didcot, U.K.) and W. M. Steen (London, U.K.)

Thin layer activation: a technique for monitoring material loss during high temperature surface degradation processes 143
J. Asher, M. J. Bennett, R. W. M. Hawes, J. B. Price, A. T. Tuson, D. J. Savage and S. Sugden (Didcot, U.K.)

Traitement de surface par laser du Nimonic 80A 151
T. Puig, J. L. Derep, J. L. Fachinetti and G. Coquerelle (Arcueil, France)

The sulphidation properties of pre-oxidized yttrium-ion-implanted Incoloy 800H 157
E. A. Polman, T. Fransen and P. J. Gellings (Enschede, The Netherlands)

The influence of laser surface treatment on the high temperature oxidation of Cr_2O_3-forming alloys. 163
F. H. Stott, P. K. N. Bartlett and G. C. Wood (Manchester, U.K.)

Laser stellite coatings on austenitic stainless steels 171
A. Tiziani, L. Giordano, P. Matteazzi and B. Badan (Padua, Italy)

EFFECT OF COATING ON THE MECHANICAL PROPERTIES OF THE SUBSTRATE, PARTICULARLY IN HIGH AND LOW-CYCLE FATIGUE, AND CORROSION-FATIGUE

Mechanical properties of coated systems 177
H. W. Grünling, K. Schneider and L. Singheiser (Mannheim, F.R.G.)

Effect of the environment on the high temperature embrittlement of Inconel 718. 191
E. Andrieu and J. P. Henon (Evry, France)

Effect of creep or low cycle fatigue on the oxidation or hot corrosion behaviour of nickel-base superalloys 199
B. Pieraggi (Toulouse, France)

Behaviour of Al_2O_3 scales on Fe–Al and Fe–Ni–Al alloys with small additions of titanium, zirconium niobium and vanadium on thermal cycling and creep in oxidizing and carburizing atmospheres 205
K. Wambach, J. Peters and H. J. Grabke (Düsseldorf, F.R.G.)

Determination of the oxidation stress distribution in a duplex oxide–metallic substrate system by a curvature method 213
A. M. Huntz and J. G. Zhao (Orsay, France)

Corrosion sous contrainte mécanique en milieu de sels fondus: montages expérimentaux: application à la corrosion de l'acier inoxydable AISI 304L en milieu NaCl–$CaCl_2$ fondu à 570 °C. 221
H. Atmani and J. J. Rameau (Saint-Martin-d'Hères, France)

Ductile-to-brittle transition temperature behaviour of platinum-modified coatings. 227
D. Vogel, L. Newman, P. Deb and D. H. Boone (Monterey, CA, U.S.A.)

Alliages austénitiques en atmosphère corrosive sulfurante à faible potentiel d'oxydation et activité carbone elevée: comportement au fluage 233
A. Lefort and G. Silvestre (Grenoble, France)

Suivi cinétique de la relaxation des contraintes de croissance au cours de l'oxydation d'un alliage Fe–Cr–Al 241
F. Nardou, L. Ranaivoniarivo, P. Raynaud and M. Billy (Limoges, France)

Interaction entre le fluage et la corrosion electrochimique en milieu de sels fondus: cas de l'acier inoxydable AISI 304L dans NaCl–$CaCl_2$ fondu à 570 °C 247
J. J. Rameau and H. Atmani (Saint-Martin-d'Hères, France)

Influence of protective coatings on the mechanical properties of CMSX-2 and Cotac 784 253
J. M. Veys and R. Mevrel (Chatillon, France)

CORROSION-EROSION

High temperature erosion in coal combustion and conversion processes: a review. 261
I. G. Wright (Columbus, OH, U.S.A.)

High temperature erosion of coated superalloys for gas turbines. 273
J. E. Restall (Farnborough, U.K.) and D. J. Stephenson (Cranfield, U.K.)

The phenomenon of adherence of a growing scale to the surface of a solid substance 283
T. Werber (Haifa, Israel)

Résistance à l'usure et à la corrosion dans le sodium liquide de revêtements d'aluminures sur aciers inoxydables austénitiques 287
Y. Depierre, S. Albaladejo, P. Latge, J. Raffailhac (Saint Paul lez Durance, France) and P. Mazars (Colombes, France)

Metal wastage in fluidized-bed combustors 295
D. M. Lloyd, E. A. Rogers, J. E. Oakey and A. J. Pittaway (Stoke Orchard, U.K.)

PERFORMANCE EXPERIENCE OF COATINGS IN PRACTICE

Current high temperature corrosion-resistant materials and a personal view of their future prospects 303
P. Hancock (Cranfield, U.K.)

High temperature corrosion of alloys and coatings in oil- and coal-fired boilers 313
D. B. Meadowcroft (Leatherhead, U.K.)

The durability and performance of coatings in gas turbine and diesel engines 321
J. W. Fairbanks (Washington, DC, U.S.A.) and R. J. Hecht (West Palm Beach, FL, U.S.A.)

20 Ans d'expérience en service sur le comportement à la corrosion des superalliages et de leur protection dans les parties chaudes des turbines à gaz industrielles 331
G. Ladoux and C. Mauhe (Bois-Colombes, France)

HIGH TEMPERATURE TECHNOLOGIES: REVIEW OF MATERIALS NEEDS

Environmental effect on the damage of high temperature materials 341
M. Van de Voorde (Petten, The Netherlands)

ABSTRACTS

A review of oxidation kinetics of carbon fibre–carbon matrix composites at high temperature 347
K. S. Goto and K. J. Han (Tokyo, Japan) and G. R. Saint Pierre (Columbus, OH, U.S.A.)

Sulphidation of iron: the effect of surface reaction and defect mobility in FeS on the kinetics of iron sulphidation 347
E. M. Fryt (Kraków, Poland)

Phénomènes d'adhérence des couches protectrices: facteurs et mesures 347
G. Beranger (Compiègne, France)

Mechanisms of scale–metal adhesion on M–Cr–Al–Y alloys 348
K. L. Luthra and C. L. Briant (Schenectady, NY, U.S.A.)

Coating compositions and microstructures in gas turbine applications 349
D. H. Boone (Monterey, CA, U.S.A.)

Equipment performance and coating quality in modern vacuum plasma spraying (VPS) 349
H. Gruner, J. P. Langagne and A. R. Nicoll (Wohlen, Switzerland)

Silicide and modified silicide coatings for high temperature applications 349
E. Fritzer and W. Remmele (Karlsruhe, F.R.G.)

The role of microstructure in the high temperature oxidation resistance of coatings 349
R. D. Sisson (Worcester, MA, U.S.A.)

La fatigue des métaux et des alliages à temperature élevée 350
B. Ilschner (Lausanne, Switzerland)

AUTHOR INDEX 351

SUBJECT INDEX 353
